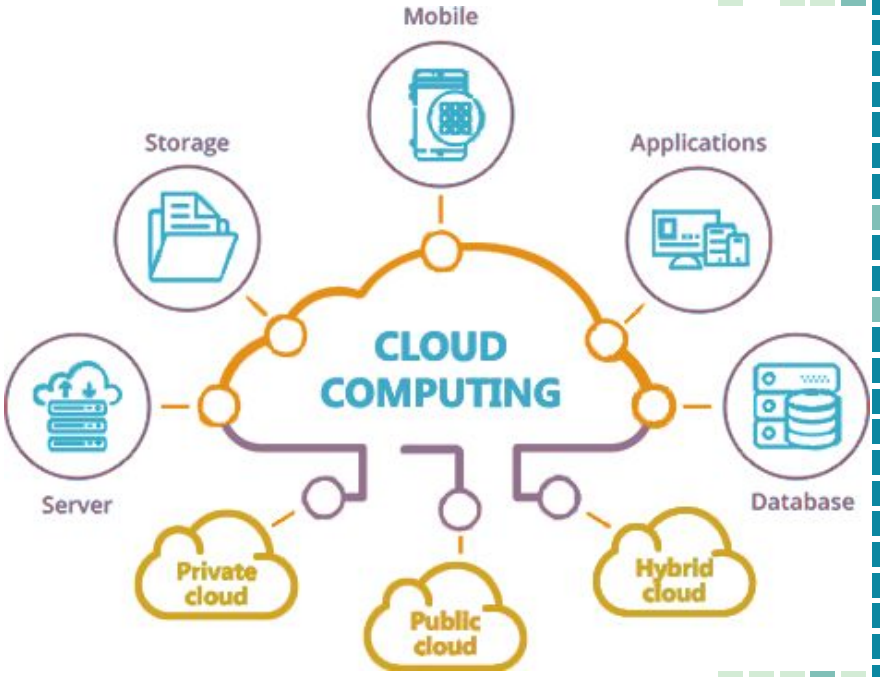
Google Photos (Cloud)

Introduction to The Cloud

- The Cloud = the Internet
- "Cloud storage involves stashing data on hardware in a remote physical location, which can be accessed from any device via the internet"



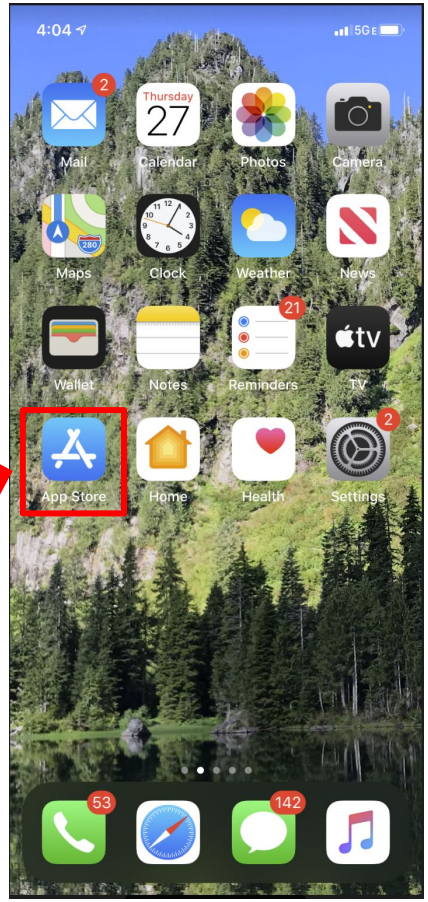
Google Photos

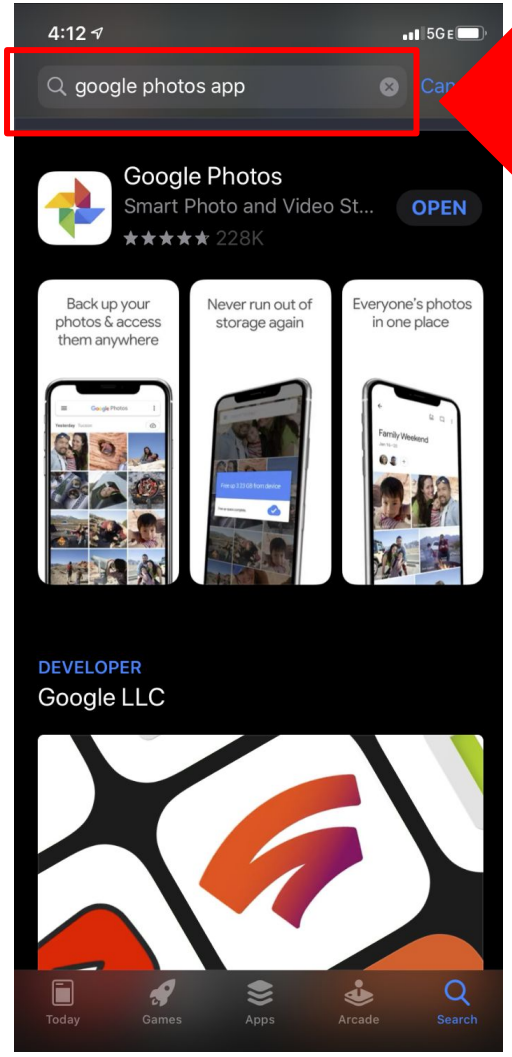
- A photo sharing and storage service developed by Google
- Benefits
  - Losing your phone does not mean you lose your photos!
  - Access your photos from any device
  - No more stressing about running out of storage on your phone
  - Share photos and albums with family/friends very easily
  - Auto-creates photo albums, collages, and movies from your photos

Downloading the app...

Google Photos

1. Select the “App Store”





2. Search for “Google photos app” in the top search bar

3. Select “Get”

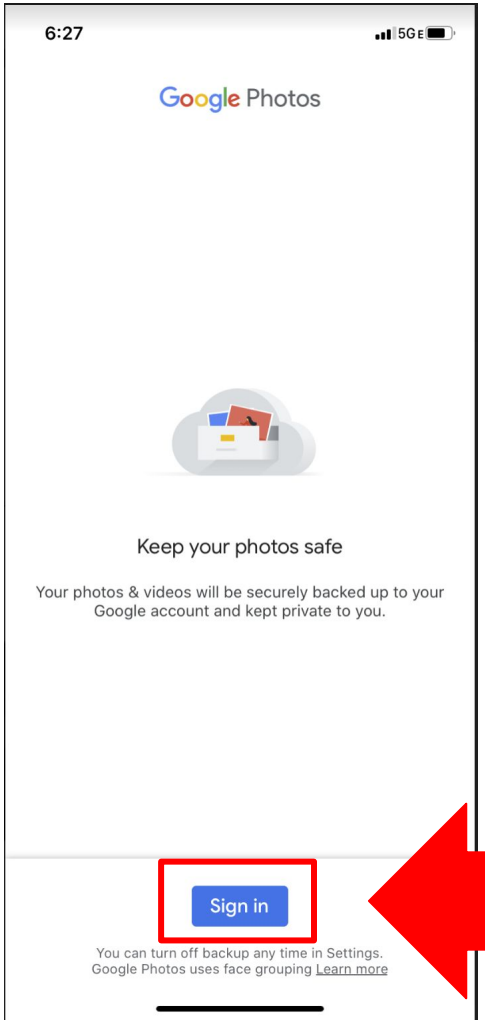
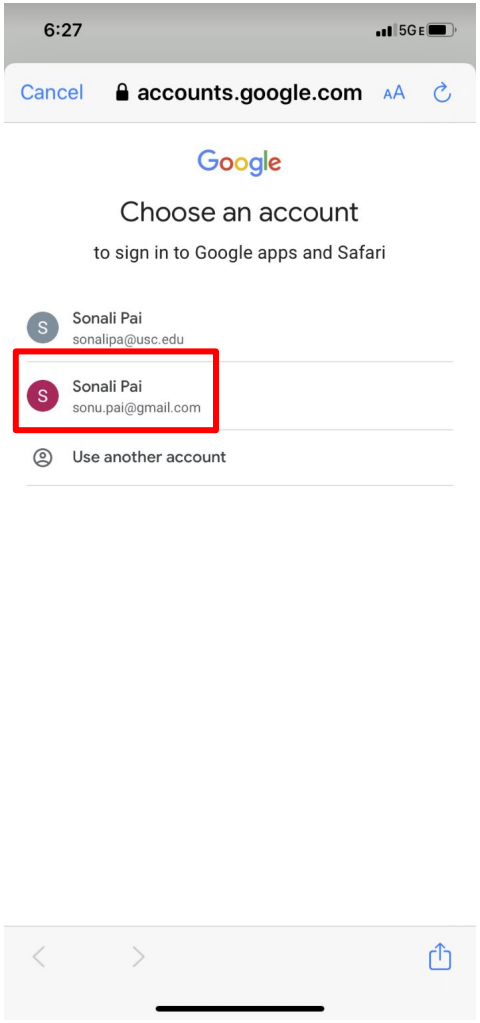
4. Click on Google Photos App

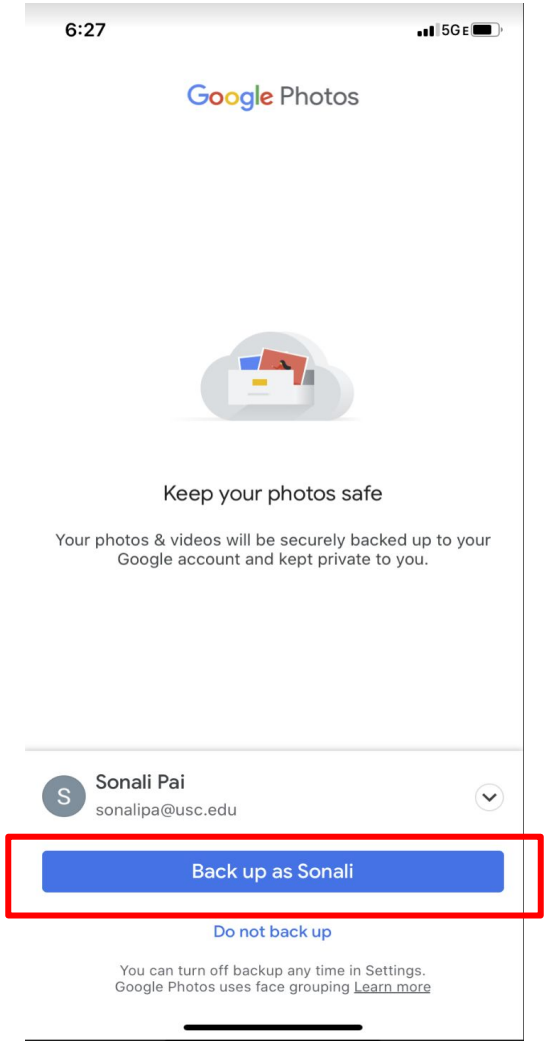
Syncing Google Photos to the photos on your phone...



1. Click on the blue "Sign In" button

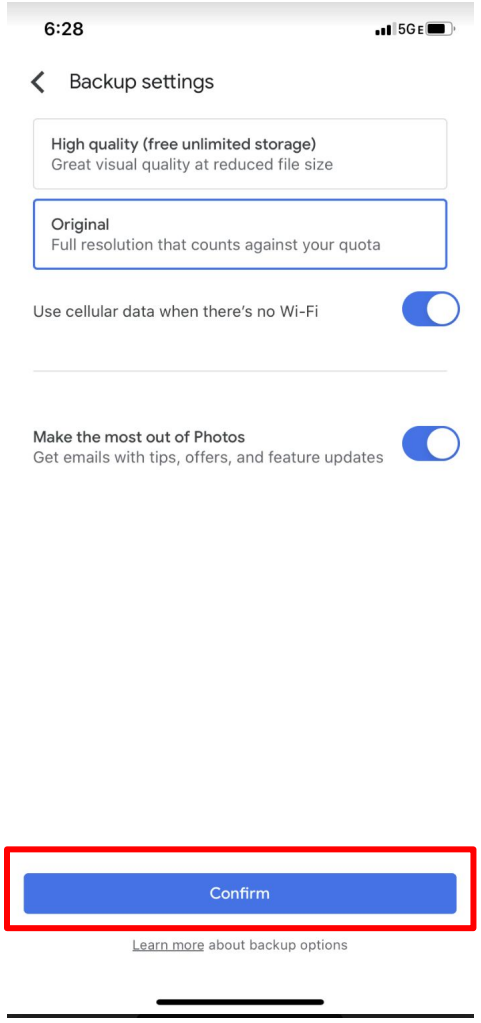
2. Click on your Google account and if it doesn't show up, click on "Use another account"

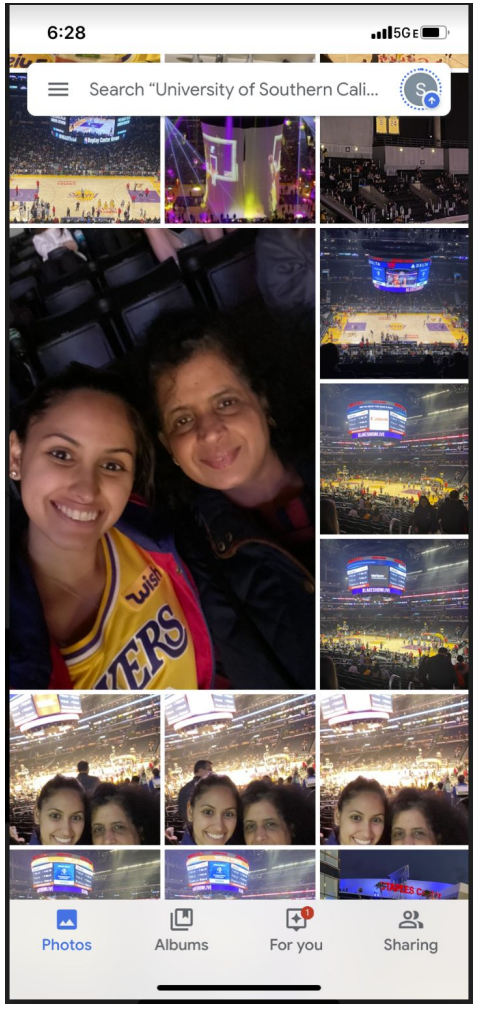




3. Once you have signed in with your Google username and password, you will be brought to this screen. Select “Back up as {your name}”

4. Select “High quality” if you’d like your images to be saved in high quality. Then, select “Confirm”.

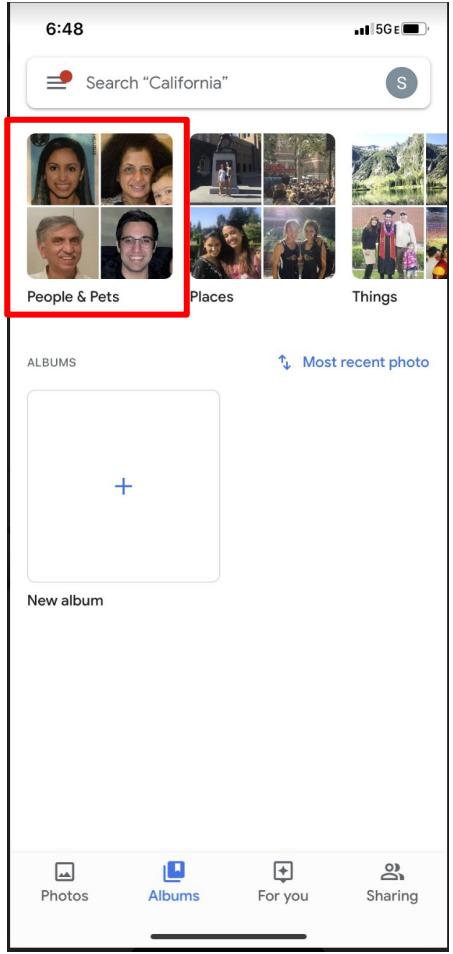


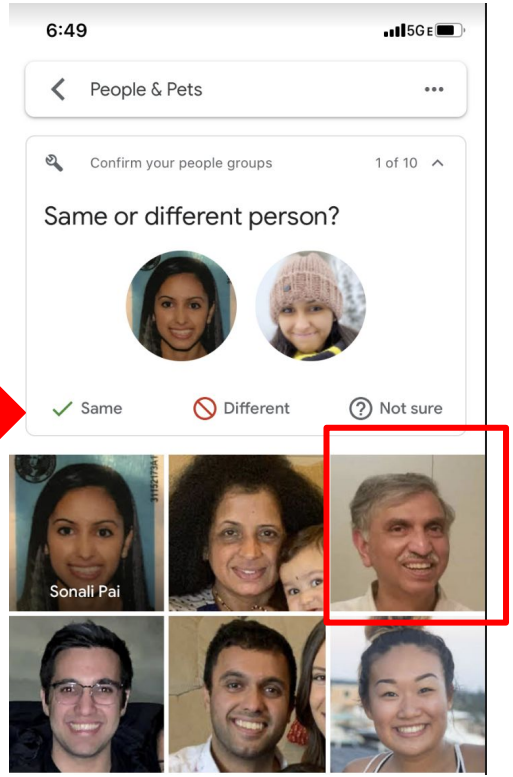


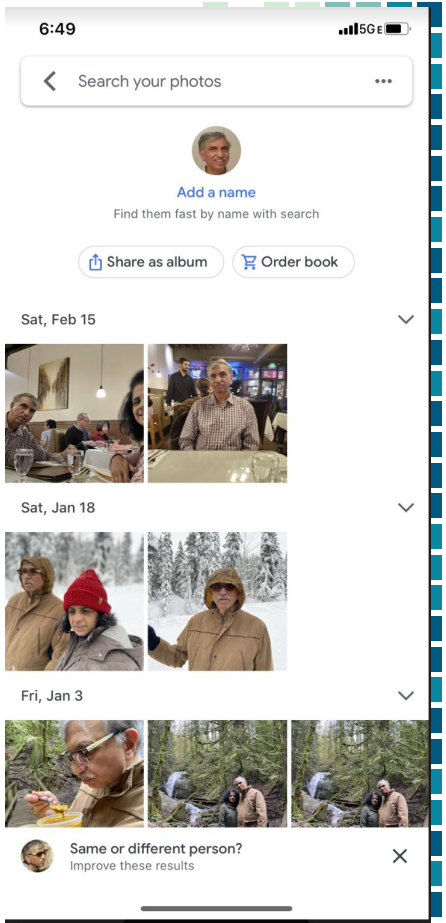
You’re all set!

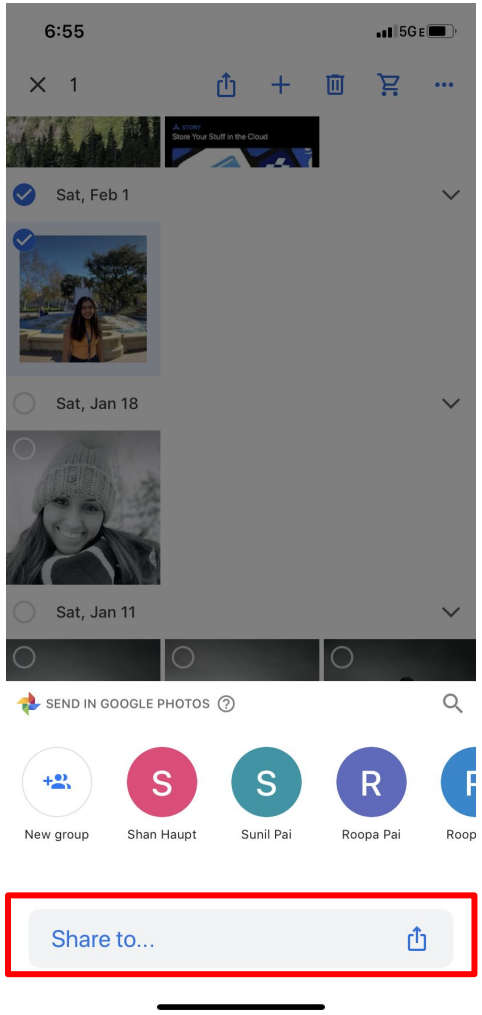
Rediscover memories and view personalized movies created by Google Photos in the “For you” tab

Search for people by facial recognition!









Share photos with your friends and family

View photos from any device now just by signing into Google Photos!
